DESCRIPTION

BEST-SELLING FORMULA. PATENT APPLICATION

- ✓ **Innovative HEMA-free formula based on IBOMA** – A biodegradable biopolymer of natural origin, providing a safe alternative to HEMA. Minimizes the risk of allergies and irritation, making it friendly for both nail technicians and clients.
- ✓ **Express curing** – The optimal concentration of photoinitiators ensures full curing at a thickness of just 2.5 mm. For salon-length nails, it cures in just 60 seconds under a UV/LED lamp.
- ✓ **Application control** – no cuticle flooding – A medium-thick, self-leveling formula enables precise work without the risk of product spreading. Gives the nail technician more time to shape the perfect nail.
- ✓ **Flexibility and durability combined** – Once cured, the gel is flexible yet harder than older generations. It does not deform after pinching and does not crumble, ensuring the perfect balance between flexibility and strength.
- ✓ **Excellent adhesion and durability** – Thanks to IBOMA monomer content and a precisely selected blend of urethane-acrylate polymers, the gel guarantees maximum adhesion to the natural nail plate, minimizing the risk of chipping.
- ✓ **Easy filing and perfect finish** – The optimized consistency and flexible yet firm formula make the product easy to file, speeding up the nail technician's work and allowing for a smooth, professional finish.
- ✓ **Shape stability** – Does not expand after removing the pinch, ensuring precise and long-lasting nail shaping.

EXPERT OPINIONS

[...] Personally, I was very pleased with the reduced burning sensation in the lamp, faster curing time, and ultra-safe formula. I'm sure your clients will love it too. Highly recommend!

Roksana Cimmino

[...] For me, the winners are: excellent adhesion and 2x shorter curing time, now also in an LED lamp. Plus, it's the only formula on the market with zero allergens and irritating ingredients, which is super important in this industry. Congratulations to the entire Silcare team, I can't wait for the launch!
