NO SoPRO UV/LED Color Hybrid Gel is ett professionellt hybridlack med innovativ sammansättning och egenskaper. Den revolutionerande allergifri formeln utan HEMA möjliggör säker manikyr även för personer som är känsliga för denna ingrediens. Produkten ger utmärkt täckning med bara 1-2 lager. Lacket är utrustat med en halvkugelformad borste som möjliggör exakt täckning av hela plattan och ett produktinläggnings under nageln.

Egenskaper: medeltjock, krämig konsistens • intensiv pigmentering • full täckning med 1-2 lager • formel utan HEMA, säkert även för en känslig platta program halvkugelformad borste.

Anmärkingar: Endast för professionellt bruk. Undvik kontakt med hud och ögon. Läs bruksanvisningen noggrant. Skydda från barn. Tillverkningsdatum och partinummer – se förpackning. Bäst användas före utgången av 12 månader från tillverkningsdatumet.

RU SoPRO UV/LED Color Hybrid Gel – это профессиональный гибридный лак с инновационной рецептурой и свойствами. Революционная гипоаллергенная формула без HEMA позволяет безопасно делать маникюр даже людям с повышенной чувствительностью к этому компоненту. Средство обеспечивает превосходную укрывистость уже в 1-2 слоя. Гель-лак оснащен полукруглой кисточкой, которая позволяет точно покрыть всю ногтевую пластину под кутикулу.

Черты: средняя-густая, кремовая консистенция • интенсивная пигментация • полная укрывистость в 1-2 слоя • формула без HEMA – безопасная даже для чувствительной пластинки • полукруглая кисточка для точного нанесения лака.

Важно: Только для профессионального использования. Избегать попадания на кожу и в глаза. Внимательно прочитать инструкцию по применению. Хранить в местах, недоступных для детей. Дата изготовления и номер партии указаны на упаковке. Срок годности – 12 месяцев с даты производства.

Patented NailHero™ complex

– the power of nourishment and protection

NailHero™ is an encapsulated nail care complex that uses **Smart Encapsulation Technology**. Thanks to this innovative technology, the beneficial active ingredients are encapsulated within substance particles. Based on their properties, the complex ensures **improvement of nail appearance and reduction of its brittleness by strengthening the nail plate by over 30% after 15 days of application.**

NailHero™

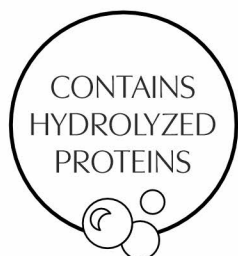

The active ingredients of NailHero™ and their effect on the nail plate:

- **hydrolyzed wheat and soybean protein** – moisturizes the nail plate, reduces brittleness, improves appearance and accelerates growth
- **amino acids (arginine, threonine and serine)** – proteins, which are the building blocks of nails; the nail plate becomes strong and healthy thanks to them
- **tea tree oil** – has antioxidant and soothing properties; protects the nail plate against adverse effects of external factors
- **vitamin E** – a strong antioxidant, strengthens the nail and prevents splitting; improves blood circulation in the nail matrix, making the nails hard and healthy

PROfessional ingredients and features

- innovative formula
without HEMA
- 80 richly pigmented
colors
- **NailHero™** complex, which cares
for the condition of the nail plate
- tea tree oil
and amino acids
- high adhesion
to the nail plate

4 easy steps towards **PRO**fessional manicure:

1 BASE

SoPRO UV/LED Hybrid Base is a professional gel polish base coat based on the revolutionary HEMA-free formula that is safe even for a sensitive nail plate. Hydrolyzed vegetable protein, amino acids, tea tree oil and vitamin E contained in NailHero™ complex guarantee plate strengthening by over 30% and noticeable reduction in breakage.

Features:

- excellent adhesion
- durability
- medium-thick consistency
- HEMA-free formula, gentle even for a sensitive nail plate
- plate strengthening and reduced breakage thanks to NailHero™ complex

2 COLOR

SoPRO UV/LED Color Hybrid Gel is a professional gel polish based on a revolutionary formula without HEMA that is safe even for a sensitive nail plate. The product provides excellent coverage already after 1-2 layers. The gel polish is equipped with a half-round brush that allows precise coverage of the entire nail plate, even under the cuticles.

Features:

- 80 colors
- medium-thick, creamy consistency
- intense pigmentation
- full coverage after 1-2 layers
- formula without HEMA – safe even for sensitive plate
- precise, half-round brush

4 easy steps towards **PRO**fessional manicure:

3 TOP

SoPRO UV/LED Top Coat is a professional top coat intended for gel polishes and UV gels. It does not leave an inhibition layer – after curing, you do not have to wipe off the nail plate. The product is easy to apply and provides a long-lasting high gloss effect. The top coat perfectly secures the stylization, extending its durability.

Features:

- easy application
- great durability and protection of manicure
- high gloss
- does not leave an inhibition layer

4 OIL

SoPRO Manicure Oil is a deeply moisturizing cuticle and nail oil. Thanks to the rich blend of oils of natural origin (soybean, grape seed, linseed, castor, argan and avocado), vitamin E and emollient complex, the product provides softness and smoothness to the skin. The oil protects the epidermis against water loss caused by external factors and helps to eliminate the feeling of tightening. It comprehensively nourishes the nail plate, supporting its regeneration.

Features:

- deeply moisturizes
- nourishes
- protects
- smooths
- leaves a scent of citrus fruits, jasmine and vanilla

PROfessional start and finish

+ CLEANER

SoPRO Nail Cleaner is a professional product based on pure isopropyl alcohol (IPA) for degreasing the natural nail plate. The composition of the product is based on undiluted with water isopropyl, which guarantees perfect cleansing properties and immediate evaporation. The cleaner effectively removes all kinds of impurities and greases, improving the adhesion of gel and acrylic mass to the nail plate. It also excellently removes the inhibition layer. The product leaves a pleasant scent of citrus fruits, jasmine and vanilla.

Features:

- perfectly degreases and cleanses
- provides high adhesion
- effectively removes the inhibition layer
- evaporates immediately
- leaves a pleasant scent of citrus fruits, jasmine and vanilla

SoPRO

Frequently asked questions:

1 HEMA-FREE gel polish – what is it?

HEMA has a binding and film-forming function in nail art products. This substance has a low molecular weight and can trigger an immune system response upon skin contact. In SoPRO gel polishes, **HEMA** was replaced with a substance with identical properties and a higher molecular weight. Its molecules cannot penetrate the skin's hydrolipid barrier as effectively, thus making the products safe to use even by people with hypersensitive, allergy-prone epidermis.

2 Why was HEMA-free gel polish created?

It was created to meet the needs of people struggling with the problem of hypersensitive plate (regardless of whether it is caused by allergies or frequent use of disinfectants) that prevented them from performing a gel polish manicure. The product is also intended for label-conscious consumers who are looking for the cleanest and safest solutions for themselves.

3 What is the difference between gel polish with HEMA and HEMA-free gel polish?

Aside from the formulation, the product also differs in consistency. **HEMA**-free gel polish is creamier than the traditional one. The base-coat is medium-thick and spreads perfectly.

4 Does the lack of HEMA affects the quality and durability of the product?

No, it does not. The lack of **HEMA** in the product does not affect its durability or quality. **HEMA** is a monomer, in other words, one of the building blocks of plastics. As an ingredient of cosmetic products, **HEMA** serves an antistatic, conditioning and, above all, binding function. It means that it helps a layer of gel polish or gel to undergo a polymerization reaction, namely, cure in UV/LED light.

5 What colors are there in SoPRO line?

There are **80 colors** in the **SoPRO line**. We decided to include the most fashionable colors in it, perfect for every occasion.

Feedback from manicure instructors

[...]
I'm in love with these colors. A really great job. These gel polishes are pure genius. Perfect colors and great coverage. The nail looks terrific only after just one layer. I love Flexy, but these products here are a higher class of gel polishes. Can't wait for them to be available for purchase!

Roksana Cimmino
Silcare brand master class
manicure instructor

[...]
When it comes to color HEMA-free gel polish, aside from different chemical composition, it is more creamy. The base coat is medium-thick, spreads easily, and it is applied the same way as any other gel polish.

Beata Śliwińska
Silcare brand manicure instructor

[...]
The new SoPRO series is rather thick. Its consistency is comparable to Premium series, but there's no problem with the color pulling away from the free edge. The coverage is marvelous! It took me only two layers to cover the nail with normally very problematic pastel yellow – usually I need to apply three layers.

Magdalena Czop
Silcare brand ambassador

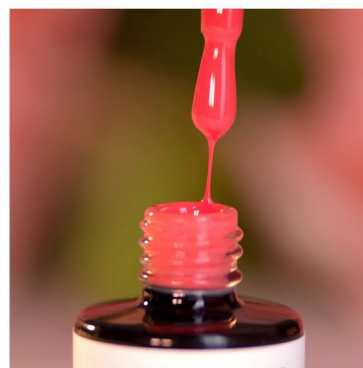

winner of, for example:
Grand Prix Dubai,
Grand Prix Mexico,
International Brilliant Cup Turkey.

[...] (...) These gel polishes are super, they cover perfectly, spread nicely. (...) The base coat is super, acts normal, I've tested it on myself and on few of my clients. The base stays on the nail, spreads and levels perfectly. If the product will enter the market, it'll be my favorite base used under gel polish.

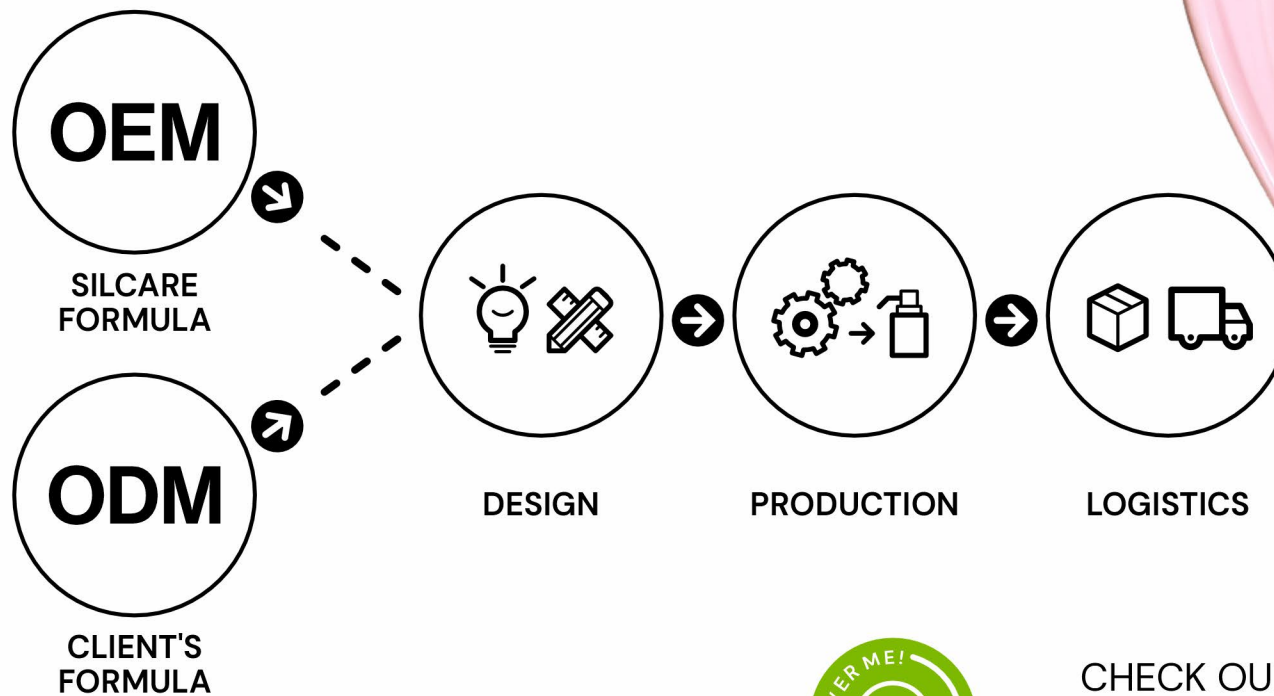

[...] (...) The gel polish base coat stays on the nails ideally. The red color covers beautifully, light pink one needs two layers. I didn't have any problems with them. The consistency of the gel polishes is wonderful.

[...] (...) I wore them on my nails for more than two weeks, they all stayed on my plate ideally, none of them chipped off, the base has a lovely consistency (...). When it comes to application, there's no problem at all, the applied layer is even, the formula didn't separate during curing, the pigment used in the colors is really good. (...)

[...] (...) The colors cover beautifully and have great consistency. They aren't see-through, and are highly pigmented. (...) The product is comfortable to work with. In general, I'm very pleased with it. The product doesn't shrink, and spreads neatly.
